Horizon Europe is a
POLITICAL INSTRUMENT
where research and
innovation are needed to
achieve the defined priorities.

Mission areas

Missions are not only about R&I – focused on delivering a public good.

They are used to agree on a European level what we want to change and deliver it in society.

**Adaptation to
Climate Change,
including Societal
Transformation**

2

Cancer

3

**Healthy Oceans,
Seas, Coastal and
Inland Waters**

4

**Climate-Neutral and
Smart Cities**

5

**Soil Health and
Food**

EU Mission Restore our Ocean & Waters

The Missions will work towards meeting the follow goals for 2030:

- **Protect and restore marine and freshwater ecosystems** and biodiversity, in line with the EU Biodiversity Strategy 2030
- **Prevent and eliminate pollution** of our ocean, seas and waters, in line with the EU Action Plan Towards Zero Pollution for Air, Water and Soil
- **Make the sustainable blue economy carbon-neutral and circular**, in line with the proposed European Climate Law and the holistic vision enshrined in the Sustainable Blue Economy Strategy

Four basins with four "lighthouses"

These four basins were initially matched with one of the three mission goals.

However, this is less pronounced in the current phase of the mission implementation.

Entering an "upscaling phase" from 2025.
