# What is the offer about?

## Resilient 6G - innovation collaboration with Finland | Vinnova

With this call for proposals, we want to increase and strengthen:

- Innovation collaboration between Sweden and Finland.
- Competitiveness and innovative capacity in Sweden and Finland.
- Knowledge development, skills supply and capacity building for the digital society.
- Ensure that future mobile communication systems are robust, secure, energy efficient, sustainable and that they can withstand and recover from disruptions and attacks.

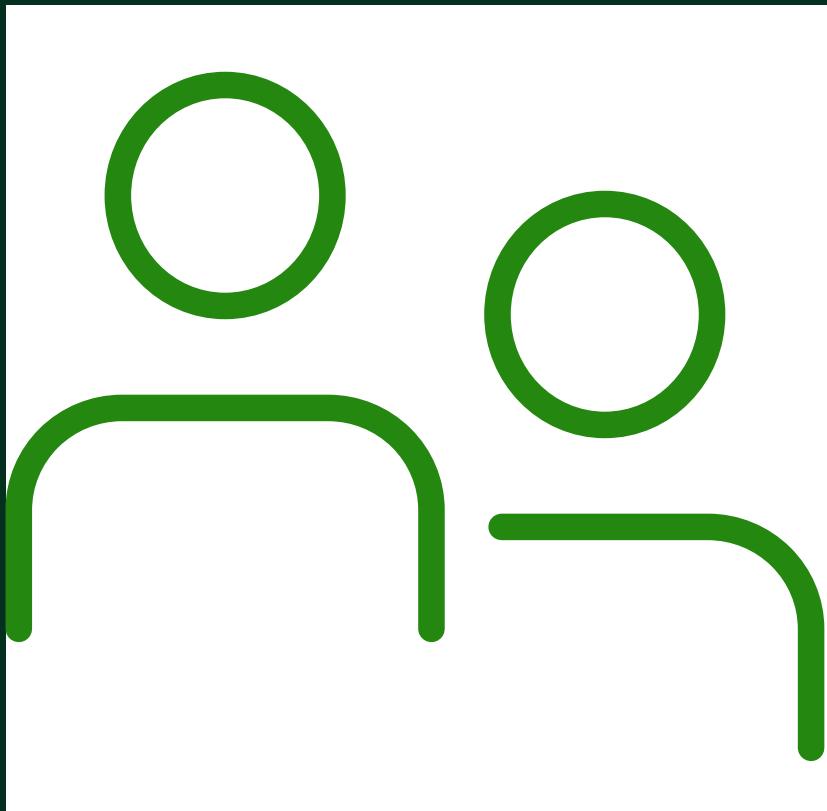

# What can you apply for?

You can apply for funding for resilient 6G networks R&I, for example such as

- adaptive and self-healing networks,
- AI-driven fault detection,
- energy-efficient algorithms,
- solutions such as balancing resilience and performance in future 6G systems.

# Who can apply?

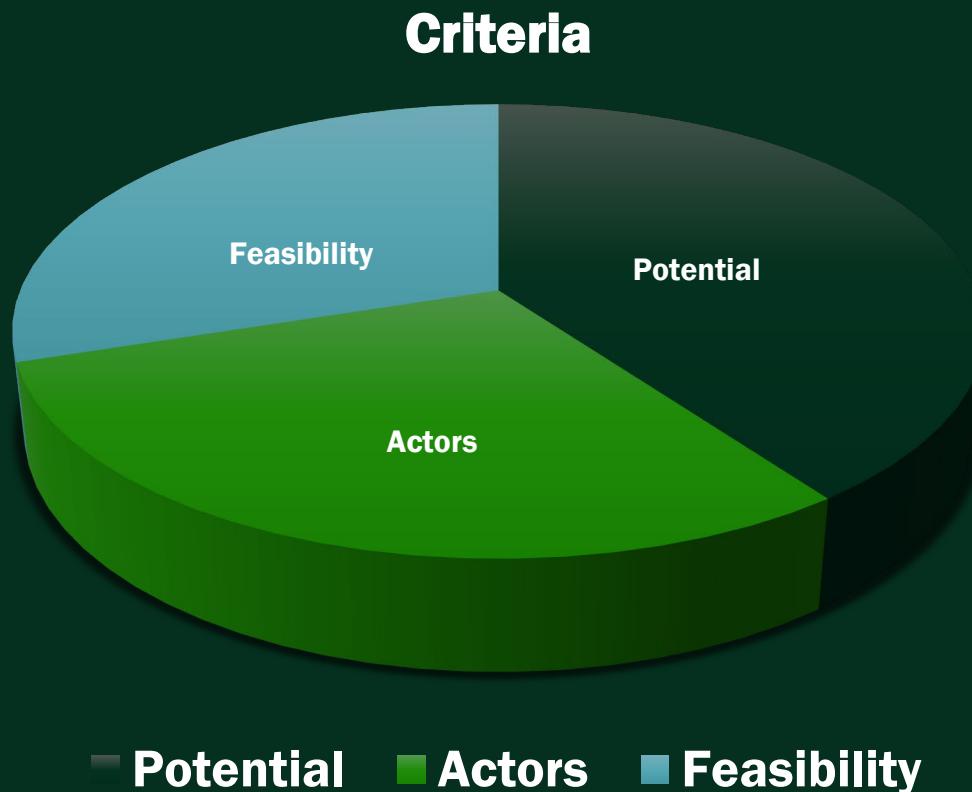

- The call is aimed for consortia with at least two participants, where companies, universities, research institutes and other relevant actors can be included.
- **At least one Finnish organization must be included.**
- **The Finnish organization cannot obtain grant at Vinnova but can apply for funding at Business Finland.**

# How much can you apply for?

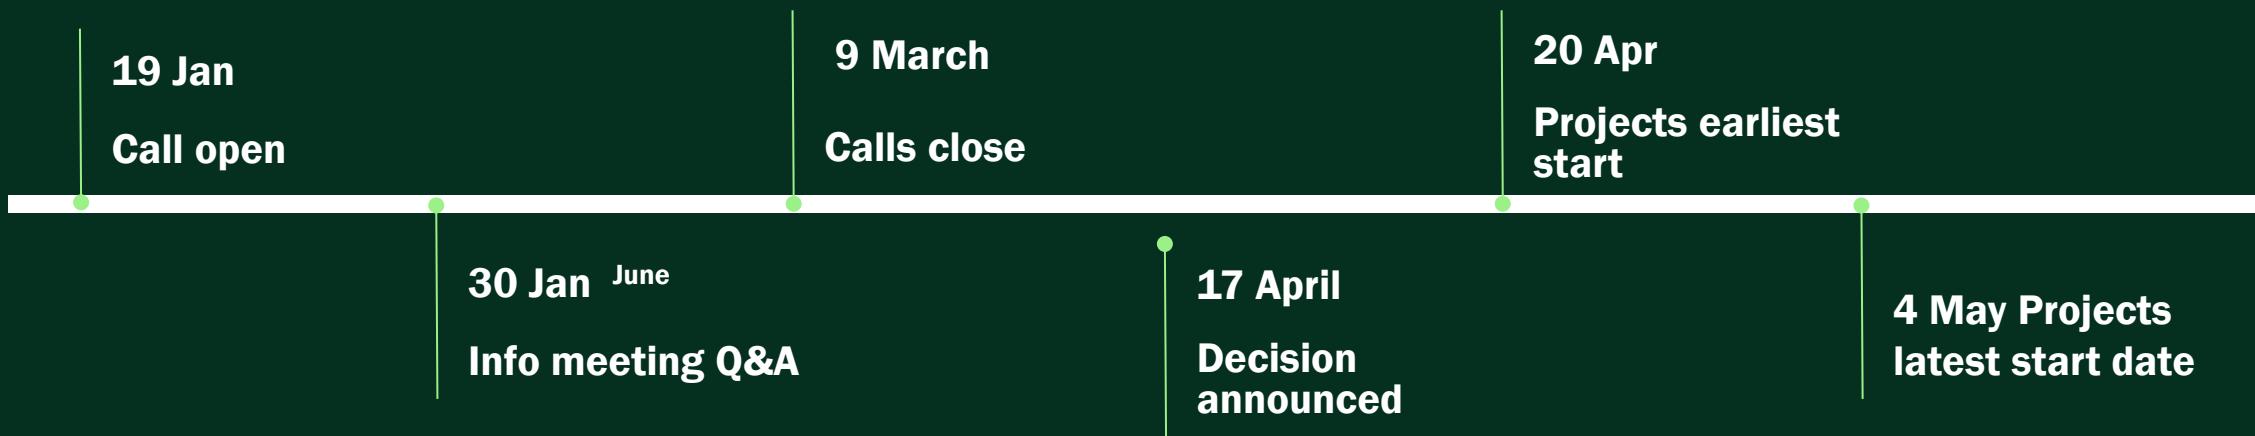

- The call's preliminary funding budget is SEK 22 million
- Vinnova's funding have no minimum/maximum limit per project.
- Maximum Vinnova funding can be up to 90 percent of the project's total eligible costs.
- Each company participant can apply funding for up to 25%-80% depending on size and type of activity (research, experimental development, collaboration...). See chapter 5 in Call text.
- More information about state aid funding rules:
